

ACE CRC SUMMER INTERNSHIPS

The Antarctic Climate and Ecosystems CRC is offering two Summer Internships based in Hobart, commencing in December 2016.

Two internships will be offered, providing students with the opportunity to undertake an 8-12 week project working alongside our world-leading climate scientists.

Both projects are focused on improving our understanding of recent changes in Southern Ocean chemistry and biology. They are available on a competitive basis to undergraduate students interested in pursuing a career in Antarctic and/or marine science.

Interns will be based at the ACE CRC in Hobart, in the University of Tasmania Waterfront Building.

Under the supervision of ACE CRC Project Leaders, interns will have the opportunity to attend seminars, planning meetings, and gain experience working in a supportive, collegiate research environment.

Upon completion of their internship, students will be required to write a report and deliver a presentation.

Interns will receive a stipend of \$700 per week - plus a return airfare to Hobart for successful interstate applicants.

WHO CAN APPLY?

Interns are required to:

- be enrolled at an Australian university.
- have completed at least three years of an undergraduate program, with an aspiration to go on to study Honours. Exceptional candidates may be considered after 2 years of under-graduate study.
- have a minimum "Credit" average, with an emphasis on high grades in subjects of relevance to the project.

HOW TO APPLY

For more information, please visit the ACE CRC website and click the 'ACE CRC Summer Internships' link on the front page.

Applicants please note that the deadline for submissions is 5:00pm, Friday 30 September 2016.

For more information call 03 6226 2440 or email enquiries@acecrc.org.au.
